

### BOOKS OF QUALITY

The professionalism and quality of implementation of e-Center were honored on June 17 at the Ecole Estienne, on the occasion of the award of the highly coveted Golden quadrat digital ITAB 2010 awarded by (Company manufacturing managers of printing).

The label that embodies the quality and expression of the technical and aesthetic excellence, and reward the courage and quality of photo books, played on the competition by the book Tanneries Haas.

Pascal Lenoir, President of the ITAB and Alain Eon, president of the jury of the 2010 Golden quadrat handed the award to our company, allowing us to confirm the recognition of professionals.

### RESPECT FOR THE ENVIRONMENT

Feeling concerned by the impact of its activities on the environment, e-Center has decided to conduct a carbon footprint of its CO2 emissions. In compensation, the company supports efforts to manufac-

ture tanks Biogas in India. The implementation of such a project now enables e-Center to offer customers sustainable actions and products more responsible.

Carbon offsetting e-Center: 7.3 biogas tanks built to avoid tons of CO2 annually 5 each or 365.4 tonnes of CO2.

### REFERENCES

Our customers are our best reference. For this, we them with our knowledge and responsiveness in order to offer their books on measurement. We adapt to each project and make every effort to meet the quality and timeliness expected.

### E-CENTER & TECNOGRAF

After few years of cooperation E-Center continue to grow up in the market with quality and performance. TECNOGRAF with this case history in France keep the way to open new door and work with this customer for optimize his solution.

With new investment on printing machine like HP E-Center become a customer leader in photobook production quality and small edition for his market. The choice of TECNOGRAF Tower Casing in machine after few years of production show to them and to us that the choice was correct and that the final investment was the right in terms of quality, out put and performance, comparing the price.

### TOWER Casing in Solution.

#### The pioneer in the Digital Hard Cover Book production

The TOWER Casing in Machine represent today a real integrate Solution for who produce books in high quality for the traditional market and for the new photo Books or Books printed with digital Technology. Few customer already are using TOWER and most of them are leader in the market for this kind of product. TECNOGRAF during 2007 was the first manufacturer to consider the hard cover

technology for the digital market. Already other company are follow us in this area but the efforts require from this kind of machine are completely different from what the traditional market is offering.

With near 60 installation of TOWER in the world, it represent a serious and potential solution for all company that desire to start his hard cover book production. The strong construction of TOWER give to every customer the opportunity to obtain high quality with a right investment. What we can offer more than our competitors : experience in this market and results ! Performance and Technology; one example : MCS ( Management Control System ). MCS (management control system) is a TECNOGRAF software to control all units of the casing-in machine "TOWER" from an extra computer. It is based on Solid Works. This software is able to accept JDF formats and memorize 1000 different

Formats. Via an internet connection it is possible to connect the machine to the TECNOGRAF service portal and check the status of every unit. All adjustments conducted by the machine operator directly at the TOWER can be handled at the extra control station equipped with MCS. Errors that occur while producing are shown on the MCS display. Furthermore the system is equipped with temperature control, pressure control and adjustment control for checking the correct position of the motor after the format changes. The MCS system displays the correct tool set according to the book format indicated by the operator.

Choose the right Solution : choose TECNOGRAF.
