Perfect Binder one clamp, Casing in Machine , Building in, Casemaker.

## THE PROJECT

The constructive experience and the knowhow about the book processing belong to its establisher, Mr. Giancarlo Bonetto .

In the nineties, TECNOGRAF set up a cooperation on international basis with Swiss and German companies, which established a partnership called BOOK TECHNOLOGY GROUP, the world's biggest association for producers of book binding machines (MÜLLER MARTINI, SIGLOCH, VBF, HÖRAUF, PROSYSTEM, SOLEMA and TECNOGRAF). This organization, which was based on a pyramidal structure, used to have on its top a single sales department in Switzerland, that used to deal all the products with its own brand. Consequently, in this period TECNOGRAF rightfully acquired the privilege of providing technical assistance and spare parts to "historical" and prestigious companies, whose brands are famous all over the world. Thanks to this, TecnoGRAF's competence increased and the quality of its work improved more and more. In 2002, a new development took place: the company began a new path, introducing itself directly to the public, without any intermediary. Thus, TecnoGRAF became a company with a whole cycle inside it, from the design to the creation of the components to the assemblage until the sale. Today, in the five-thousands square metres of its new headquarters in Brendola.
